## WHO IS CPP?

CPP is a not for profit, physician driven organization whose board is comprised entirely of private practice physicians. Founded in 1985, and probably one of the oldest physician driven buying groups in the US, CPP early on committed to supporting physician practices and the children, adolescents and adults they serve. Highly regarded by members, affiliates and vendors, CPP is considered a leader in vaccine purchase programs. CPP is the only not for profit vaccine buying group, which allows us to direct additional savings back to the members through a rebate program.
